Modern flooring for a practical lifestyle

PURELLO

FIX 30 V / FIX 55 V

Tiles with **high dimensional accuracy** are made with standard LVT technology from multiple layers of vinyl.

For a gluedown installation on prepared base Schönox Durocol adhesive is recommended.

PURELLO

CLIC 30 V silento RIGID SPC

Rigid planks with **high dimensional accuracy** are made with the most modern extruded **RIGID SPC** technology from pure vinyl and limestone. Planks are **dimensionally accurate** even with significant changes in flooring temperatures.

Silento – integrated underlay from acoustic foam of 1 mm height easily adheres to the smooth base (no additional underlays needed).

Patented **Uniclic** locking system is **very precise and strong**. Planks are being easily and quickly installed as a floating floor with no need for fixation.

Excellent price quality ratio

PURELLO vinyl floors achieve **superior quality** compared to usual offer on the market.

Long lifetime and easy maintenance

PURELLO vinyl flooring is **even more durable and easier to clean** thanks to PUR surface treatment, saving water consumption, energies and cleaning agents in the process.

Very low thermal resistance

PURELLO vinyl tiles do not prevent heat transfer from **floor heating**. When installing on heated floors, the usual principles are being applied.

Healthy environment

PURELLO vinyl floors fulfill hygienic requirements of valid European standards. Does not contain any recycled materials or **phthalate plasticizers**.

Authentic decors

PURELLO decors have natural wooden appearance with **perfect reproduction of oak trees** in both natural and trending shades. The fine surface embossing together with slightly beveled edges enhance true illusion of natural design.

Proven areas of use

PURELLO vinyl tiles are suitable for all types of **high-traffic residential areas and commercial areas with moderate-traffic**.
